FACILITIES CAPITAL OUTLAY DATA BASE

HISTORICAL DOCUMENTATION

July 1, 2009

**Overview**

The Facilities Capital Outlay Data Base has evolved and matured over the last ten years since the original conceptualization in 1989. Understanding how, when, and why data elements were changed is critical when the Community College and Technical Center MIS (CCTCMIS) responds to requests for information that span several years. The historical change document outlines additions, deletions, and changes to the Student Data Base. This document was created by reviewing existing listings, catalogs, and dictionaries of data elements.

**Historical data element change documentation**

The short descriptions that follow outline each data element field tracked in the historical data element change document, along with the codes used to document the changes, additions, and deletions to the data elements over the previous years.

**Number**

Data elements are numbered using a four-digit element number methodology.

**Element Name**

The full name of the element. Global Changes will be located in this field for changes that affect all data elements in the data element dictionary.

**Column Name**

The name of the column in DB2 which stores the data element. Reserved for future use.

**Description**

A description of the meaning or intended use of the data element.

**Change Date**

The date the data element was created or changed.

**Implement Date**

The date the creation or change was implemented.

**Change Code**

Codes used for documenting the additions, deletions, or changes made to the data elements.

- EL Data Element
- NU Data Element Number
- EN Data Element Name
- CN Column Name
- DS Data Element Description
- TV Data Element Table Value
- ED Data Element Edit Criteria
- PD Data Element Physical Description

**Change**

The data element as reflected after the change.

**Reason**

The reason why the addition, deletion, or change was made to the data element.

**INDEX**

Included within this section is the historical data element dictionary index. This index identifies the data element number and name. The data elements are arranged in data element number order for the Facilities Capital Outlay Data Base
